

READING & MATH SUPPORT ONLINE ANYTIME

**Help your scholars improve reading fluency, stamina, and comprehension
with Reading Plus.**

Reading Plus Login Information

1. Go to login.readingplus.com
2. Click on Student Login
3. Enter site code: **rppoja**
4. Enter username: **Student ID Number**
5. Password: **Student last name with first letter of last name uppercase**

Imagine Math

There is a continuing Math initiative between the Seventh and Eighth Grade Math Department and the company, Imagine Math (formerly known as Think Through Math). This program will be part of our Response to Intervention (RTI) goals to help our scholars improve in all areas of Math and **help bring scholars up to and beyond grade level.** Scholars take multiple benchmark assessments which places

them at their level of understanding, then gives them practice and challenges to master their lacking skills and bring them up to and beyond 8th grade level. Scholars will use the program weekly during our RTI day.

Additionally scholars may access the program from home and build their skills on their own time. The more they do, the more improvements we will see in their academics. Access the website at:

www.thinkthroughmath.com Scholars use their student ID as the username and their birthdate as the password. There is no site key needed.
